

XG-DIA - dedicated internet access

Fast Facts:

BroadAspect is a North American regional network service provider that offers a suite of Fiber2Cloud network services in three core regional service areas:

- Chicago, IL Metro Area
- Washington, DC Metro Area
- Western Region (Coming Soon)

With a robust metropolitan fiber network, BroadAspect is able to deliver high performance circuits for bandwidth intensive applications such as Dedicated Internet Access, Metro Cloud Access, Cloud data protection and HD Video Conferencing.

Responsive Customer Focused Support

- 24x7x365 NOC operation provides support when you need it the most.
- Single customer portal with 360 degree view of deployed services.
- Integrated account and support teams provide cohesive customer communication.
- Business Service Level Agreement (SLA) written with straight forward business language.
- Rapid customer provisioning in On-Net buildings and Metro POPs.

End-to-End Service with Enterprise Power.

For growing mid-size businesses we offer XG-DIA - Dedicated Internet Access (DIA) services that provide "end-to-end" connectivity to the internet. Built solely to serve business customers, BroadAspect has forged a powerful set of private peering, public peering and interconnect agreements which enable low latency access to the Internet destinations that your users demands.
